

INDUSTRY PLATFORMS

shecco's industry platforms aim to enhance the worldwide use of the natural refrigerants carbon dioxide (CO₂, R744), hydrocarbons (HCs, R290, R600a etc), ammonia (NH₃, R717), water (H₂O, R718) and air (R729) as natural, low global warming potential (GWP) and energy-efficient refrigerants in heating, cooling & refrigeration applications.

With a unique mix of News, Products and a Community, R744.com, hydrocarbons21.com, ammonia21.com, and R718.com attract 10,000+ regular readers including CEOs, technical directors, refrigeration engineers, marketing and sales managers, policy experts and more.

NEWS

- articles on latest product developments
- reporting from all major industry events worldwide
- daily policy, market and technology updates

PRODUCTS

- extensive database of natural refrigerant (Nat-Ref) refrigeration products and services with direct sales contacts
- global directory of NatRef companies
- database of technical papers, reports and presentations

COMMUNITY

- global business contact database allowing you to network and share information
- find people, projects and business opportunities
- event updates, file sharing, forum discussions and more
